#### Second Quarter 2021 and Recent Business Highlights

#### Commercial Growth:

- Grew total volume to 20,856 genomic tests, an increase of 215% compared to the same period in 2020 and 44% compared to the first quarter of 2021.
- · Achieved key managed care milestones for our genomic tests:
  - Received final Medicare coverage policy for the Decipher Bladder test from Noridian, our Medicare Administrative Contractor, through the MoIDX program.
  - Signed a managed care contract with a major health plan, making the Decipher Prostate test an in-network benefit for eligible patients among the plan's approximately 20 million members nationally.
  - Granted reimbursement for the Prosigna breast cancer test in Germany for eligible patients with HR+/HER2- early-stage breast cancer, enabling hospitals and laboratories in Germany to perform the test locally.

#### Evidence Development and Pipeline Advancement:

- Presented 14 abstracts demonstrating the performance and utility of our current and pipeline genomic tests at the American Thoracic Society (ATS), American Society of Clinical Oncology (ASCO) and European Society of Medical Oncology (ESMO) Breast Cancer annual meetings. This included the presentation of pivotal clinical validation data at the ASCO meeting demonstrating the ability of the Percepta Nasal Swab test to improve the early assessment of lung cancer.
- Published data demonstrating the prognostic utility of Veracyte's Decipher Prostate genomic classifier:
  - Data published in *JAMA Oncology* suggest that, among men with non-metastatic castration-resistant prostate cancer (nmCRPC), the Decipher test can help identify those patients most likely to benefit from treatment with apalutamide, a second-generation androgen receptor signaling inhibitor (ARSi), in addition to androgen-deprivation therapy (ADT).
  - Findings from a study published in Prostate Cancer and Prostatic Diseases suggest the Decipher test may help guide treatment decisions for men with early-stage prostate cancer who are candidates for active surveillance.

#### Global Expansion Progress:

- Announced the planned acquisition of HalioDx to further accelerate growth and strengthen Veracyte's global leadership in cancer diagnostics. The acquisition is intended to provide three strategic benefits to Veracyte:
  - Accelerate IVD test development and manufacturing operations in Europe;
  - Expand the company's scientific expertise into the emerging immuno-oncology field; and
  - Broaden Veracyte's cancer diagnostics scope into eight of the top 10 cancers by U.S. incidence.
- Added key new hires to further strengthen the executive team and position the company to scale globally:
  - Rebecca Chambers as executive vice president and chief financial officer;
  - Rob Brainin as executive vice president and chief business officer; and
  - Bill Zondler as senior vice president and chief information officer.

#### 2021 Financial Outlook

Veracyte is increasing its 2021 annual total revenue guidance to a range of \$200 million to \$208 million from its previous guidance range of \$190 million to \$200 million. This range represents 69% to 76% total revenue growth for fiscal 2021 compared to fiscal 2020, and increased from Veracyte's prior estimate of 61% to 69% total revenue growth.
